

A HEALTHY SOLUTION!

ARMAGH DELIVERS EVERYTHING RETAILER WANTED AND MORE

A health-food business with two retail outlets decided it needed a better long-term solution to drive successful growth, after 37 years of ringing up orders on standard cash registers and tracking inventory on notepads.

Management at the Gentle Rain of Stratford and Green Valley Health & Herbs in Elmira spent a year researching and interviewing POS providers before shifting from cash registers to the Armagh POS Solutions Catapult retail POS system.

"I really liked the flexibility of Catapult," explains Michelle Dennis, General Manager of the Gentle Rain, which like Armagh is celebrating its 40th anniversary in 2019.

"It gives us features that weren't available in products from other vendors. The ability to receive and sell 'weighables' (bulk products) as well as produce were big pluses for me. Our owner Brendan Davidson liked the fact that the system is web based. He can dial in from his laptop anywhere he is - he can look at sales, run a report, and see where our inventory stands."

Michelle says Catapult also gave the business the ability to easily implement a customer loyalty program. "Our VIP program allows you to earn points on supplements

and body care, and you can redeem them for anything you'd like in the store.

"We've also done promotions in grocery, bulk, dairy and produce. It's a chance to give something back to our customers, and it's been a huge success. We recently launched a birthday VIP program which gives customers a \$5 coupon on their birthday."

The ease of putting items on sale has also helped drive sales.

Michelle adds that the Catapult back office delivers powerful store management insights. "It's amazing, there are at least 50 different sales reports you can run - zero movement reports, sales history reports and more which let you see how an item is performing. If it's an A it's a great seller, if it's a C or D it's not so great and if it's a G you should consider getting rid of it."

Michelle says she and her team really appreciate the support provided by Armagh before, during and after installation of the system.

"We would definitely recommend Armagh and Catapult for any store with multiple departments and weighables - it works very well for us."

Gentle Rain GM Michelle Dennis says the ability to receive and sell everything through the POS system was a big plus in the decision to go with the Armagh Catapult system.

About Armagh POS Solutions

Armagh has been serving the retail, food service and grocery industries in Canada since 1979, delivering solutions for a range of operators from single-unit small businesses to multi-unit national chains.
